

# SimTrainer Guest Policy

Effective May 1, 2016, the following SimTrainer Guest Policy is in effect:

**The purpose of the Guest Policy is to give guests a safe and educational experience at the range with the goal of encouraging the guest to become a member and use the facility independently.**

Members are permitted to bring guests to the range once the member has been to the range **at least three times**, and the member has demonstrated proper use of the range and operation of the equipment.

**Guests are limited to only one visit as a guest.** Members are only permitted to bring **one guest at a time**. The exception to this is that members will be permitted to bring multiple out-of-town guests at one time; however, members must call the range at least 48 hours in advance to ensure adequate staff members are available to supervise the range. **All guests must pay the required \$10 guest fee upon arrival at the range.** If the guest joins the range on the day of the visit, the \$10 guest fee will be discounted from whichever membership option is chosen.

**Guests must read and sign the Non-Member Waiver form.**

Guests are required to shoot in the same **assigned stall as the member and with the member in the stall providing direct, arms-reach supervision**. Prior to entering the range, **the member must review the applicable range rules with the guest. Once in the range stall, the member must demonstrate to the guest how to safely and properly handle each firearm to be shot.** This active demonstration is required for every guest, regardless of member's perception of the guest's competence with the firearms being used. The member is responsible for any guest rules violation.

Guests are restricted to non-magnum caliber rounds in guns **owned by the member or rented from the range and which the member is experienced in safely handling and shooting**. Guests are not permitted to shoot any other firearms without consent of the staff member on duty.

**Guests are never permitted to shoot fully-automatic firearms. No exceptions.**

Members are responsible for hanging and positioning the target. **Guests are not permitted to operate the target retrieval system.** Members are financially responsible for any damage to the target system or any other part of the range. Failure to report damage prior to leaving the range session shall be considered a violation of the Guest Policy.

**Violations of this Guest Policy may result in suspension or revocation of membership privileges.**
